About me

Professional with remote experience in frontend using React, JavaScript, TypeScript, and Tailwind css in an Agile Squad environment.

Education

UTN   2027
Information Systems Engineering

UTN   2027
Industrial Engineering

GCBA   2022
Full Stack Web Development

Experience

Frontend Developer   Remote
Government of the City of Buenos Aires   Sep 2023 - Dec 2023

Contracted to develop a web application for the management of partners and events. I worked on the development of the database, and the frontend of the application, using React; using agile methodologies such as Scrum and Kanban.

Projects

Personal Blog and Portfolio
https://blog.kizzan.dev

Personal blog developed with Astro, available in multiple languages and with their respective RSS feeds, and deployed with GitHub Actions.

Click Counter Game
https://kizzandev.github.io/challenge_tec_juego-contador

Technical test with React and TypeScript that consists of counting the number of clicks you made during 5 seconds.

To Do List
To Do List made with Node.js, Express.js and Typescript that allows adding, deleting, and marking the tasks as completed (CRUD).

Text File Compressor and Decompressor
Text file compressor and decompressor with the Huffman algorithm for the Algorithms and Data Structures class with C++.

Questions and Answers Game
Quiz game with Python. Create your own games and share them. The questions are always shown in random order and shows the final score.
